Subject Index

Acceptor-like excitons 421
Acoustic phonons 1, 129, 414
AgBr nanocrystals 60, 400, 414
AgI nanocrystals 400
Au_2S/Au coated nanoparticles 21
Auger autoionization of nanocrystals 158, 212, 386
Auger recombination 158, 170, 212, 310
Auger-like thermalization 158

B-doped Si nanocrystals 352
Biexcitons 185, 269, 377
Bound exciton complexes 386

Carrier selective injection 310
$Cd_{1-x}Mn_xSe$ nanocrystals 35
CdS nanocrystals 1, 48, 69, 158, 185, 253, 281
CdS/PbS coated nanoparticles 21
CdS/PVK films 48
CdS_xSe_{1-x} nanocrystals 69, 129, 144, 212, 222
CdSe nanocrystals 1, 69, 129, 144, 185, 212, 222, 238, 253, 269, 281, 386
CdSe/ZnS capped nanocrystals 253
Charge generation 48
Charge transfer sensitizers 468
Charge transport 48
Cluster beam deposition 333
Coated semiconductor particles 21, 253
Co-melting growth technique 1
Co-sputtering growth technique 1, 35, 352
Coulomb interaction 185
CuBr nanocrystals 1, 60, 386
CuCl dots embedded in NaCl 377
CuCl nanocrystals 1, 60, 129, 144, 203, 377, 386
$CuCl_xBr_{1-x}$ nanocrystals 1
CuI nanocrystals 386

Dangling-bond surface states 170, 294
Depolarization field 222
Diamagnetic shift 435
Donor-like excitons 1, 414

Effective dielectric constant 170
Electroluminescence 294, 310
Electron paramagnetic resonance 85
Electron–hole exchange interaction 144, 222, 269
Electron–phonon interaction 129
Etched quantum dots 108
Exciton–exciton interaction 377
Exciton–phonon interaction 414, 435, 448
Excitonic dephasing rate 129
Excitonic magnetic polarons 35

GaAs nanocrystals 95
GaP nanocrystals 95
Ge nanocrystals 60

High-pressure phase transitions 69
Hole burning 386, 435
Huang–Rhys factor 129, 238, 253
Hydrostatic pressure 435

InP nanocrystals 95
In-plane polarization anisotropy 320
Indirect gap semiconductors 170, 294, 400
Ion exchange colloidal growth technique 21
Ion-implantation growth technique 1, 333

Kerr effect 212

Linewidth 108, 238

Magnetic field effect 144
Melting temperature of nanocrystals 69
